

Title: Energy Storage Sizing, Placement and Valuation for Distribution Networks

SCR: 2847.0

Type: Open Source Software

Did you write code? Please select one: YES ☒ NO ☐

Did you help create/develop the GUI? Please select one: YES ☒ NO ☐

Please list your individual contributions:

I wrote the code to calculate metrics and the federate to integrate metrics calculation with the other components of the simulation. I also coded the GUI form for configuring metrics.

Individuals who may be authors:

SNL

Ujjwol Tamrakar

John Eddy

William Vining

External

Each author that was mentioned in the Software questionnaire **must complete and sign** this Authorship Memorandum.

Please confirm that the list of authors is complete and that no other authors exist. If other authors exist, please add them to the list above.

Please note that the term “Author” is a legal term.

An individual is considered an author if they:

- Wrote code for the development of the software
- Created the graphical user interface

An individual is **not** considered an author if the individual only provided:

- Ideas
- Guidance
- Project Management
- Bug fixes/corrections

Once you have completed these requirements, please convert the document to a PDF, e-sign and date, then email the memo to the Copyright Administrator (copyrightadmin@sandia.gov).

The completed Authorship Memo is UCI and Attorney/Client Privileged and should be handled as such.
